Technology Group activities and positions

The Technology Group has three main roles: Advocate for technologic changes of value to residents, advisor to RVM leadership and staff on technology issues under consideration and developers of solutions to specifically defined technology problems faced by the RVM resident community.

Position job description : We are looking for a few residents willing to devote a few hours a month in support of the Group's roles as stated above. We are looking for both information technically skilled individuals who can work the details of a technical issue and also seeking non-technically trained individuals who would like to help ensure that technical solutions are truly useful for the resident community at large. An adjunct member would be someone who has very specific expertise or just wants to occasionally help.
